

SERIE

SPIDER 13.80

SELF-PROPELLED AERIAL WORK PLATFORMS

promax
powered access → reaching heights safely

Compact, Light and Easy to use

- Class leading stability when fully deployed.
- Super-compact stabilization foot print and zero tail-swing.
- The most stable drive when off-road.

EASY MAINTENANCE

- Simple and friendly controls and on-board features.
- Light-weight for ease of transport

SERIE SPIDER 13.80

BEST PERFORMANCES

1. Automatic and proportional side outreach

- This safety system automatically reduces the outreach by monitoring the stability and the cage overload.
- No jib restrictions with the max load in the basket.
- The system enables easy positioning of the basket in any working situation.

2. 360° rotation with no tail-swing

- The innovative design with telescopic boom and fly jib enables the free rotation without any protruding part.
- Cranked outriggers designed for increased ground clearance.

3. User friendly

- All designed to make the use simple.
- Wired remote control unit for drive.
- A multifunction manual operated control for stabilization.
- A 4 function remote control unit in the basket to operate the booms.
- All designed to operate the machine smoothly.

4. Uncomparable design and fabrication care.

- Process from steel to the product is carefully checked and followed.
- Fully protected by metal covers against falling objects.
- Easy access to maintenance compartments.
- Air/water and 230Vac outlets are available into the basket.

5. Standard with double drive speed.

- The model is particularly suitable for indoor use with electric power, therefore the double speed is essential to drive the model to the working site.
- Particularly useful when powered by batteries, enabling long drives with little power consumption.

6. Hydraulically extending under carriage

- On demand it is possible to order the machine with extending tracks to improve the drive stability.
- With this undercarriage and longer tracks the stability is guaranteed in any rough terrain.

7. Quick detach and interchangeable basket

- The designed allu basket enables a fast and easy removal.
- They're interchangeable basket for single or two persons.
- A single pin to remove and fit the basket plus a sensor to check the right installation is done by the operator.

8. The smallest tracked-lift offered in HYBRID version.

- In order to have a versatile machine different power solutions are available: The standard powered by engine and electric motor 230/110Vac mains. The electric one, powered by deep cycle batteries and electric motor 230/110Vac. The Hybrid one, the smallest spider powered by engine and batteries 24Vdc.

- Electric pump 24Vdc with deep cycle batteries

STANDARD EQUIPMENT	VERSION		
	STD	E	ED
Double telescopic boom with flying jib	•		
Combustion engine Honda petrol type	•	--	•
Smooth and multifunctions el.hydraulic controls	•		
Light allu basket and easy detachable	•		
Air/water and 230Vac outlets into the basket	•		
Stabilization with electronic levelling sensor (max 1,5°)	•		
Double drive speed hydraulic system (slow/fast)	•		
Wired remote control panel for drive	•		
All components are well protected against objects fall.	•		
Deep cycle batteries and electric-pump 24Vdc	--	•	•
Battery charger with double charging select. (10/23 Ah)	--	•	•
Single phase electric pump 230Vac/110Vac	•	•	--
Built-in fault messages diagnostic	•		
EXTRAS - ON DEMAND	STD	E	ED
Non marking rubber tracks particularly suitable for delicate floors.	•		
Honda iGX390 instead of Honda GX270 engine	•	--	•
Hatz Diesel instead of Honda GX270 engine	•	--	•
Lithium-Ion battery pack for longer working cycle	--	•	•
Oversized foot plates for soft ground.(diam.330mm)	•		
Oversized square 40x40cm nylon plates supplied with on-board housing frame.	•		
Single man basket	•		
Electric power pack for emergency descent (12Vdc).	•	•	--
Basket working light	•		
Arctic lubricants for cold climate	•		
Biodegradable hydraulic oil	•
